		2402	<i>Epidemiology</i>	Promoted to Group (was 111706)	The AEA welcomes the addition of epidemiology as a separate group. This will allow the AEA (and research organisations involved with epidemiological research) to track how much research is done in our field.
		240201	Disease Modelling	New Field	This might be better framed as 'Epidemiological modelling', given that epidemiologists do not always work on a particular disease, but might focus on health behaviours/risk factors that important for good health (or disease risk reduction).
		240202	Disease Surveillance	New Field	As above. Perhaps rename 'Surveillance of health-related exposures and outcomes'.

		240308	Health Surveillance	Split out from 111711 Health Information Systems (incl. Surveillance)	Not clear how this differs from existing 'Disease surveillance' under Epidemiology. Is this a distinction between surveillance within and outside of the health system?
